

DUROGUM™

DuroGum™ is a convenient way to seal a joint, crack or any opening so that no moisture, dust particles or air can enter the crevice. It is a gray, permanently soft, non-toxic compound which will adhere to clean, dry surfaces including metal, plastic, wood and glass. It will not adversely affect other plastic materials or corrode metals. It also has no adverse effect to human skin.

DuroGum is applied by hand and can be shaped to any form and reused if necessary. It has countless other applications in the refrigeration, heating and cooling, plumbing, electrical, and metal fabrication fields as well as being an excellent general purpose sealant around the home. It may be painted immediately after application and will not bleed through the dry paint.

FEATURES:
